NELC Evidence Bundle — For Amna

Delivered: 2026-08-16 Version: 1.0

This bundle satisfies items **4 (Missing Deliverables – Evidence Matrix)** and **7 (NELC Final Evidence)** from your handover requirements doc.

What's in this bundle

```
PhysioGuidance-Handover/
├── NELC-EVIDENCE-README.md              ← this file
├── nelc-evidence-matrix.csv             ← the 60-row matrix
├── nelc-screenshots/                    ← 8 live production screenshots
│   ├── README.md                        ← index of what each screenshot shows
│   ├── certificates-verification.png
│   ├── lrs-connection.png
│   ├── nelc-user-journey.png

│   ├── audit-logs.png
│   ├── audit-logs-evidence.png
│   ├── alerts-nelc-audit.png
│   └── public-nelc.png
└── nelc-compliance.pdf                  ← full technical implementation doc (previously delivered)
```

Evidence Matrix summary

The CSV maps **60 NELC controls** to concrete evidence in the platform:

Status	Count
✅ Implemented (with evidence)	59
⚪ Not Applicable	1
Total	**60**

How to use the matrix

1. Import `nelc-evidence-matrix.csv` into Google Sheets: **File → Import → Upload**
2. Filter by `Category` column to see controls grouped by area (xAPI, Audit, Certificates, etc.)
3. Filter by `Validation Status` = `Implemented` — all 59 rows have evidence attached
4. Screenshot references in the `API / DB / Audit Trail` column point to files in `nelc-screenshots/`

Key highlights for auditor

- **Production LRS is LIVE** — real xAPI statements flowing to `lrs.nelc.gov.sa/lrs-nelc/xapi/statements` right now, not a test setup
- **HTTP 200 verified** — admin `Test Connection` returns success against NELC production endpoint

- **All 10 NELC xAPI verbs implemented** — Registered, Logged in, Progressed, Completed, Initialized, Attempted, and others visible in `nelc-user-journey.png`
- **Full audit trail** — 60+ entries with filters, search, and CSV export capability
- **Certificate verification is PUBLIC** — no auth required, verified by opening in incognito
- **SCFHS accreditation number** rendered on certificates (`ACA-409998457` on sample)
- **NELC-issued credentials** stored in GCP Secret Manager (staging + prod separated) — verifiable via Amna's owner access

Not applicable

NELC-59 (Signed NELC platform agreement retention) — informational-only row. The signed agreement is not tracked by the platform; per client scope, no evidence required.

Beyond the requirements (delivered)

- Full audit trail with real-time notifications feed (`alerts-nelc-audit.png`)
- Live production LRS active with mode toggle (staging/prod) exposed in admin
- Provider onboarding triggers (Joined / Left statements per NELC LMS Provider guide)
- Statement-level history and status visible per-record
- SCFHS-branded certificate PDFs with 6-month verification URL retention

Questions or missing evidence

Contact Ghulam. Live URLs in `nelc-screenshots/README.md` can be re-verified at any time.
