Prepared by: Gamma Developers | Lead: Ghulam
Milestone: M4 | 2025

All Locked Decisions

Every decision below was confirmed during planning. These decisions govern how the entire system is built.

Decision	Your Choice
Supervisor Role	Admin only — no new role, no flag person
Ticket Threading	Linear messages on platform only. Email alerts notify parties. No replying via email.
Ticket Assignment	Round Robin across 4 agents
Priority Setting	System auto-assigns by category — student never sees or sets priority
FRT Breach Action	Auto reassign to next agent in Round Robin. Timer fully resets. Breach logged. Admin notified (email + in-app).
TTR Breach Action	No auto reassignment. Agent keeps ticket. Admin notified (email + in-app). Admin decides manually. Breach logged.
All Agents Exhausted	Ticket goes to Admin as last resort after all 4 agents breach FRT
Admin Authority	Admin can reassign any ticket to any agent at any time regardless of status or breach type
Timer on Reassignment	Fully resets for new agent — fresh full window
FRT / TTR Timelines	Admin configures in settings. Default: High=FRT 30min/TTR 4hr, Medium=FRT 2hr/TTR 24hr, Low=FRT 8hr/TTR 72hr
SLA Clock Type	Business hours only — Sunday to Thursday, 9 AM to 6 PM AST
On Hold / Pause	Agent can pause SLA clock with mandatory reason. Protects agent from unfair penalties.
CSAT Survey	Sent once 15 minutes after ticket resolved. No reminder if not answered.
CSAT Follow-up	Score 1 or 2 triggers automatic follow-up email within 1 hour
NPS Survey	Triggered when student certificate is issued. Once per course per student.
Notification Channel	Resend for all emails. Unifonic/Infobip for SMS and WhatsApp (mock adapter during dev).
Inbound Email	Not implemented. Students must reply on platform — not via email.

16 Complete Flow Diagram
17 Priority Assignment Rules Reference
18 Status Reference

Chapter 1 — Admin Configures the System

Before any ticket ever gets created Admin logs in and configures two things that everything else runs on.

Business Hours

Platform Working Hours

- Working Days: Sunday – Thursday
- Working Hours: 9:00 AM – 6:00 PM
- Timezone: Arabia Standard Time (AST)
- SLA clocks only count down during these hours
- Tickets submitted outside hours show student a message explaining when support resumes

SLA Policy

Priority	FRT Target	TTR Target	Example Use Case
■ High	30 minutes	4 hours	Zoom access, Login blocked, Payment failed
■ Medium	2 hours	24 hours	Certificate delay, Course content issue
■ Low	8 hours	72 hours	Minor UI issue, General enquiry

Round Robin Agent Order

4 Support Agents — Rotation Order

- 1st ticket → Sara
- 2nd ticket → Ahmed
- 3rd ticket → Khalid
- 4th ticket → Nora
- 5th ticket → Sara again (cycle repeats)
- Admin can reassign any ticket to any agent at any time

Chapter 2 — Student Opens a Ticket

It is Sunday 9:15 AM. Business hours just started. Fatima is on her Learner Dashboard. She cannot join her Zoom session. She clicks Open Support Ticket.

What Fatima Sees

A simple form. No priority field. No SLA information. Just her problem.

Subject	`I can't join my Zoom session`
Category	`Zoom / Session Access ▼`
Description	`I click the join button but nothing happens. It just spins and nothing opens.`

Why No Priority Field?

- Students always pick High — everyone thinks their problem is most urgent
- Showing priority creates frustration when students see Low on their ticket
- Priority is an internal operational tool — not a customer-facing concept
- System assigns it automatically based on category — consistent and fair

Chapter 3 — System Takes Over

The moment Fatima clicks Submit your backend processes everything automatically in this exact order.

Step 1 **Priority Auto-Assigned by Category**

```
Category = Zoom / Session Access → Priority = HIGH
```

■ *No human involved. Instant. Based on Admin-configured rules.*

Step 2 **Round Robin Fires**

```
Last ticket went to: Nora Next in rotation: Sara Ticket assigned to Sara
```

■ *Sara is now responsible for this ticket.*

Step 3 **Ticket Created in Database**

```
ticket_id: #1042 | student: Fatima | category: Zoom / Session Access priority: HIGH | status: New | assigned_to: Sara | created_at: 9:15 AM
```

Step 4 **SLA Business Hours Clock Starts**

```
Current time: Sunday 9:15 AM ■ Inside business hours FRT deadline: Sunday 9:45 AM (30 minutes of business time) TTR deadline: Sunday 1:15 PM (4 hours of business time)
```

■ *If submitted at 11:45 PM Saturday — clock would start Sunday 9:00 AM instead.*

Step 5 **Two Resend Emails Fire Simultaneously**

```
Email 1 → Fatima: Ticket #1042 received, expected response within 30 minutes Email 2 → Sara: New HIGH priority ticket assigned, FRT deadline 9:45 AM
```

■ *Sara also sees a red badge on her dashboard bell icon.*

Chapter 4 — Agent Responds — Threading in Action

Sara logs in at 9:20 AM. She sees ticket #1042 on her Kanban board showing 25 minutes remaining on FRT. She opens it and uses a macro to reply.

Sara's Kanban Board

NEW	IN PROGRESS	RESOLVED	CLOSED
#1042 ■ HIGH Fatima Zoom / Session Access ■ 25 min remaining	—	—	—

Sara Applies a Macro — Reply Fills Automatically

Sara clicks Apply Macro → selects 'Zoom Session Access Issue'. The reply box fills instantly with a professional response with variables already resolved.

```
Hi Fatima, Thank you for reaching out. Please try the following: 1. Make sure you are joining from the platform 'Join Session' button — not a direct Zoom link 2. Clear your browser cache and try again 3. If on mobile, please switch to desktop browser If this doesn't resolve the issue please reply to this ticket. Best regards, Sara PhysioGuidance Support Team
```

Sara clicks Send at 9:28 AM.

What Happens the Moment Sara Clicks Send

FRT Timer	Sara replied at 9:28 AM — target was 9:45 AM	**■ FRT MET — 13 minutes**
Ticket Status	New → In Progress	**first_response_at recorded**
TTR Timer	Still running — deadline 1:15 PM	**■ 3hr 47min remaining**

The Conversation Thread on Ticket Page

[9:15 AM] Fatima (Student)

I click the join button but nothing happens. It just spins and nothing opens.

[9:28 AM] Sara (Support Agent)

Hi Fatima, thank you for reaching out. Please try the following: 1. Make sure you are joining from the platform Join Session button. 2. Clear your browser cache and try again. 3. If on mobile, please switch to desktop browser.

Resend Email Sent to Fatima

- Subject: Sara replied to your ticket #1042
- Body: Sara has replied to your support ticket.
- Button: [View Full Reply and Respond] — links to platform ticket page
- Fatima reads the email, clicks the button, lands on the ticket page
- She does NOT reply via email — she must reply on the platform

Chapter 5 — Student Replies Back

Fatima tries the steps. Still not working. She types in the reply box on the platform at 9:35 AM and clicks Send.

[9:15 AM] Fatima (Student)

I click the join button but nothing happens. It just spins and nothing opens.

[9:28 AM] Sara (Support Agent)

Hi Fatima, thank you for reaching out. Please try the following steps...

[9:35 AM] Fatima (Student)

I tried all the steps but still the same problem. The button just keeps spinning.

Resend Email Sent to Sara

- Subject: Fatima replied to ticket #1042
- Body: Fatima has replied to your support ticket.
- Button: [View Ticket] — links directly to ticket #1042
- Sara sees the reply and continues investigating

Chapter 6 — Internal Notes — What the Student Never Sees

Sara suspects this is a backend issue — Fatima's account is not linked to the Zoom session properly. She needs to flag this to the dev team but does not want to worry Fatima. She selects Internal Note in the reply toggle.

[9:15 AM] Fatima (Student)

I click the join button but nothing happens. It just spins and nothing opens.

[9:28 AM] Sara (Support Agent)

Hi Fatima, thank you for reaching out. Please try the following steps...

[9:35 AM] Fatima (Student)

I tried all the steps but still the same problem. The button just keeps spinning.

[9:38 AM] Sara (Support Agent) ■ INTERNAL NOTE

Checked Fatima's enrollment record. Zoom registration webhook did not fire for this student. Flagging to backend team to manually trigger it. Will update student once confirmed.

Internal Note Rules

- Fatima cannot see this note — ever
- No email is sent to Fatima when an internal note is posted
- Only Sara and Admin can see internal notes
- Internal notes are visible in the audit log for compliance
- Agent selects Internal Note toggle before clicking Send

Sara contacts the dev team. They fix the Zoom webhook. Sara verifies Fatima's session link is now active. Sara posts a public reply at 10:45 AM.

[10:45 AM] Sara (Support Agent)

Hi Fatima, we have resolved the issue on our end. Your Zoom session link is now active. Please click the Join Session button again and it should work. Let us know if you face any further issues.

The complete thread visible to Fatima shows only the public messages. The internal note is completely hidden from her view.

Chapter 7 — Ticket Resolved

Fatima confirms it works. Sara marks the ticket Resolved at 11:00 AM.

FRT	Replied at 9:28 AM — target was 9:45 AM	■ **MET — 13 minutes**
TTR	Resolved at 11:00 AM — target was 1:15 PM	■ **MET — 1hr 45min (target 4hr)**
Status	In Progress → Resolved	**resolved_at: 11:00 AM recorded**

Resend Resolution Email to Fatima

```
Subject: Your ticket #1042 has been resolved Hi Fatima, Your support issue has been resolved. If your issue is not fully resolved you can reopen this ticket within 48 hours. Thank you for your patience. PhysioGuidance Support Team [ Reopen Ticket ]
```

Chapter 8 — CSAT Survey

15 minutes after resolution — at 11:15 AM — a background job automatically sends Fatima a CSAT survey via Resend.

The Survey Email

```
Subject: How did we do? — Ticket #1042 Hi Fatima, We recently resolved your support ticket. How satisfied were you with our support? Click your rating — no login required: ■ ■■ ■■■ ■■■■ ■■■■■ Very Bad Bad Okay Good Excellent 1 2 3 4 5
```

How the One-Click Token Works

Token System — No Login Required

- Backend generates a signed JWT token: contains ticket_id, user_id, expires in 72 hours
- 5 unique links built: physioguidance.com/csat?token=abc123&score;=1 through score=5
- Each star in the email is one of these links
- Fatima clicks 4 stars → browser opens → backend validates token → score stored
- Token marked as used → cannot submit again
- Token expired after 72 hours → page shows 'This survey has expired'

What Gets Stored

```
ticket_id: #1042 student: Fatima agent: Sara score: 4 channel: email submitted: 11:17 AM
```

Score Outcomes

Score	Action
5 — Excellent	Recorded. Sara's CSAT average goes up. No further action.
4 — Good	Recorded. No further action.
3 — Okay	Recorded. No further action.
2 — Bad	Recorded. Follow-up email sent to Fatima within 1 hour. Flagged on Sara's stats.
1 — Very Bad	Recorded. Follow-up email sent to Fatima within 1 hour. Flagged on Sara's stats. Admin can see.
No response	Nothing happens. Survey sits unanswered. Response rate tracked separately. No reminder sent.

Chapter 9 — FRT Breach — Sara Goes Offline

Same ticket. Different scenario. Sara receives the assignment at 9:15 AM but goes offline immediately. Nobody touches the ticket.

Time	Event	Details
9:15 AM	Ticket Created	Assigned to Sara via Round Robin. FRT deadline: 9:45 AM
9:22 AM	■■ FRT Warning	75% of FRT time used. Sara notified: 8 minutes remaining
9:45 AM	■ FRT BREACH	Sara did not respond. Breach charged to Sara permanently. Cannot be reversed.
9:45 AM	Auto Reassignment	Ticket reassigned to Ahmed (next in Round Robin rotation)
9:45 AM	Timer Reset	Ahmed's FRT deadline: 10:15 AM (fresh 30 minutes). TTR deadline: 1:45 PM (fresh 4 hours).
9:45 AM	Notifications Sent	Sara: breach recorded. Ahmed: new ticket assigned. Admin: breach alert (email + in-app).

Three Notifications Fire Simultaneously at 9:45 AM

Notification → Sara
- Email + In-app notification
- You missed the FRT deadline on ticket #1042
- This ticket has been reassigned to Ahmed
- This breach has been recorded in your performance report

Notification → Ahmed
- Email + In-app notification
- Ticket #1042 has been assigned to you
- Previous agent missed FRT deadline
- Student: Fatima | Priority: HIGH | Waiting since 9:15 AM
- FRT Deadline: 10:15 AM — you have 30 minutes

Notification → Admin
- Email + In-app notification
- FRT Breach recorded — Ticket #1042
- Sara did not respond within 30 minutes
- Ticket auto-reassigned to Ahmed
- No action required unless you wish to intervene

Chapter 10 — All Agents Fail — Escalation to Admin

Worst case scenario. Every single agent misses their FRT deadline one after another.

Time	Event	Details
9:15 AM	Assigned to Sara	FRT deadline: 9:45 AM
9:45 AM	■ Sara breaches	Auto reassigned to Ahmed. Timer resets. FRT deadline: 10:15 AM
10:15 AM	■ Ahmed breaches	Auto reassigned to Khalid. Timer resets. FRT deadline: 10:45 AM
10:45 AM	■ Khalid breaches	Auto reassigned to Nora. Timer resets. FRT deadline: 11:15 AM
11:15 AM	■ Nora breaches	All 4 agents exhausted. Ticket assigned to Admin as last resort.
11:15 AM	■ CRITICAL ALERT	Admin receives urgent email + in-app. Student waiting 2 hours with zero response.

CRITICAL — Admin Notification at 11:15 AM

- Subject: CRITICAL — Ticket #1042 has no agent response after 2 hours
- All 4 support agents have missed their FRT deadline
- Student Fatima has been waiting since 9:15 AM with zero response
- Ticket is now assigned to Admin — immediate action required
- Admin must personally handle or manually assign to an available agent

Important — Each Agent's Breach is Independent

- Sara's breach recorded at 9:45 AM — charged to Sara only
- Ahmed's breach recorded at 10:15 AM — charged to Ahmed only
- Khalid's breach recorded at 10:45 AM — charged to Khalid only
- Nora's breach recorded at 11:15 AM — charged to Nora only
- Each agent's performance stats reflect only their own breaches
- Admin can review the full escalation chain in the audit log

Chapter 11 — TTR Breach — Sara Replied but Didn't Resolve

Different scenario. Sara replied at 9:28 AM — FRT is met. But the issue is complex and the TTR deadline of 1:15 PM passes without resolution.

Time	Event	Details
9:15 AM	Ticket Created	Assigned to Sara. FRT: 9:45 AM. TTR: 1:15 PM
9:28 AM	■ FRT Met	Sara replied in 13 minutes. first_response_at recorded.
1:15 PM	■ TTR BREACH	Sara has not resolved the ticket. TTR deadline passed.
1:15 PM	No Reassignment	Sara KEEPS the ticket. She is already in conversation with Fatima.
1:15 PM	Notifications Sent	Sara notified: TTR deadline passed. Admin notified: TTR breach — you may intervene.

Why No Auto Reassignment on TTR Breach?

- Sara has already been talking to Fatima — the student knows who Sara is
- Switching agents mid-conversation confuses the student
- The new agent has no context about what was already tried
- Sara notified + Admin notified is enough — Admin decides if intervention is needed
- Admin can manually reassign at any time if they want to

Admin's Options After TTR Breach

Option	Action	When to Use
Do nothing	Sara keeps ticket. Admin monitors. Breach is recorded.	Sara is actively working, just taking longer than expected
Reassign manually	Admin picks any agent from dropdown and reassigns	Sara is clearly stuck, overwhelmed, or offline
Contact Sara directly	Admin sends internal note or calls Sara	Admin wants to understand why it's taking long

Chapter 12 — On Hold — Protecting the Agent

Sara replied to Fatima and found the issue is a backend bug — completely outside her control. She is waiting on the dev team. TTR deadline is approaching. Sara puts the ticket On Hold to pause the SLA clock.

On Hold Reasons Sara Can Select

Reason	SLA Clock	Auto-Resume / Max Hold Time
Waiting for development team	Paused ■	Resumes when Sara sets back to In Progress
Waiting for student response	Paused ■	Auto-resumes after 48 hours. Student gets reminder at 24 hours.
Waiting for third party (Zoom/Payment)	Paused ■	Resumes when Sara sets back to In Progress
Waiting for Admin decision	Paused ■	Resumes when Admin or Sara sets back to In Progress

Real Example With Numbers

Time	Event	Details
9:00 AM	Ticket Created	FRT: 9:30 AM. TTR: 1:00 PM
9:28 AM	■ FRT Met	Sara replied. Status: In Progress
10:00 AM	■ On Hold	Sara puts ticket On Hold. Reason: Waiting for development team. SLA clock paused.
1:35 PM	■ Resumed	Dev team fixed the issue. Sara sets back to In Progress. SLA clock resumes.
2:00 PM	■ Resolved	Sara resolves the ticket.
	Effective TTR Calc	9:00→10:00 = 1hr (Sara working) + 10:00→1:35 = PAUSED (dev team) + 1:35→2:00 = 25min (Sara closing) = 1hr 25min total charged to Sara

Result — Sara is Clean

- Effective TTR: 1 hour 25 minutes
- TTR target: 4 hours
- Result: MET — no breach recorded against Sara
- The 3 hours 35 minutes waiting on dev team are not counted against anyone
- Hold duration is visible in audit log for Admin to review

Anti-Abuse Rules

Sara Cannot Abuse On Hold

- Hold reason is MANDATORY — cannot put on hold without selecting a reason
- Every hold is fully visible to Admin in real time on their dashboard
- Admin can REMOVE a hold at any time if they believe it is unjustified
- Reports show total hold time per agent — patterns are visible to Admin
- Waiting for student response hold has a maximum of 48 hours then auto-resumes

Chapter 13 — Business Hours Edge Case

A student submits a ticket at 11:45 PM on Saturday night. What happens?

Business Hours Clock Behaviour

- Ticket submitted: Saturday 11:45 PM
- Business hours: Sunday – Thursday, 9:00 AM – 6:00 PM AST
- SLA clock does NOT start at 11:45 PM — outside business hours
- SLA clock starts: Sunday 9:00 AM when business opens
- FRT deadline: Sunday 9:30 AM (30 minutes after business opens)
- TTR deadline: Sunday 1:00 PM (4 hours of business time)
- Agent arrives Sunday morning — sees the ticket — has a full fresh 30 minutes to respond

What the Student Sees

```
Ticket #1043 — Status: Received Our support team is available: Sunday – Thursday, 9:00 AM – 6:00 PM AST Your ticket will be reviewed when business hours resume. Expected first response: Sunday 9:30 AM
```

Note: Student knows not to expect a midnight response. No false urgency created. No unfair breach against the agent.

Chapter 14 — NPS Survey — Weeks Later

Weeks after the support ticket — Fatima finishes the physiotherapy course and her certificate is issued. This is the NPS trigger.

NPS Trigger Logic

- Trigger: Certificate is issued — not when course is completed
- Backend checks: has Fatima received NPS for this course before? → No → Send survey
- If already sent: skip — never send NPS twice for the same course
- Fatima completes 3 courses = 3 separate NPS surveys sent at certificate issuance of each

The Survey Email

```
Subject: How likely are you to recommend this course? Hi Fatima, Congratulations on completing Physiotherapy Basics! How likely are you to recommend this course to a colleague? (0 = Not at all — 10 = Definitely would recommend) 0 1 2 3 4 5 6 7 8 9 10 (each number is a one-click link — no login required)
```

How NPS Score is Calculated

Score Range	Category	Role in NPS Formula
9 – 10	**Promoter**	**Counted in formula — positive**
7 – 8	**Passive**	**Ignored in formula completely**
0 – 6	**Detractor**	**Counted in formula — negative**

NPS Formula Example

- 100 students responded to the survey
- 60 clicked 9 or 10 → 60% Promoters
- 25 clicked 7 or 8 → 25% Passive (not used in formula)
- 15 clicked 0 to 6 → 15% Detractors
- NPS = 60% - 15% = 45
- Above 0 is acceptable. Above 50 is excellent. Above 70 is world-class.

Chapter 15 — What Admin Sees Across Everything

Admin Dashboard has a Support and Satisfaction widget showing the health of the entire support operation at a glance.

Admin Support KPIs Widget

KPI	Value	Target	Status
Avg FRT this month	22 min	30 min	■ Good
Avg TTR this month	2.1 hrs	4 hrs	■ Good
Active Breaches	0	0	■ Clean
CSAT Average	4.2 / 5	4.0+	■ Good
NPS Score	47	50+	■ Near Target
Open Tickets	12	—	—
On Hold Tickets	2	—	—

Agent Performance Table

Agent	Avg FRT	Avg TTR	CSAT Avg	FRT Breaches	TTR Breaches
Sara	18 min	1.8 hr	4.4	1	0
Ahmed	24 min	2.1 hr	4.1	0	**1**
Khalid	12 min	1.5 hr	4.6	0	0
Nora	28 min	3.2 hr	3.9	2	1

Top Issues This Week

Category	Tickets	Visual
Zoom / Session	23	■■■■■■■■■■■■■■■■■■■■■■■■
Login Issues	14	■■■■■■■■■■■■■■■
Certificate	8	■■■■■■■■
Billing / Payment	6	■■■■■■■
Content / Materials	4	■■■■■

Chapter 16 — Complete Flow Diagram

Student submits ticket

Category selected → system reads it → priority auto-assigned → Round Robin assigns agent → SLA business hours clock starts → Resend notifies student (confirmation) + agent (new ticket)

Agent responds before FRT deadline ■

Thread starts on platform. Each message triggers Resend email to other party. Student replies on platform only — not via email. Internal notes invisible to student.

Agent resolves before TTR deadline ■

Status → Resolved. Resend resolution email to student. 15 minutes later → CSAT email sent once via Resend. Student clicks rating. Stored under agent's performance stats.

Agent misses FRT deadline ■

Breach logged permanently against that agent. Auto-reassign to next agent in Round Robin. Timer fully resets for new agent. Admin notified (email + in-app). Repeat until all agents exhausted → ticket goes to Admin.

Agent replied but misses TTR deadline ■■

No auto-reassignment. Agent keeps ticket. Admin notified (email + in-app). Admin decides manually whether to intervene. Breach logged.

Agent puts ticket On Hold

SLA clock pauses. Reason mandatory. Hold visible to Admin in real time. Admin can remove hold. Clock resumes when agent sets back to In Progress.

Certificate issued (weeks later)

System checks if NPS was already sent for this course. If no → Resend sends NPS survey once. Student clicks score. Stored. Admin NPS dashboard updated.

Chapter 17 — Priority Assignment Rules Reference

These rules are configured by Admin and applied automatically at ticket creation. Student never sees or sets priority.

Category	Default Priority	Auto-Upgrade Condition
Zoom / Session Access	■ High	Always High
Login — Cannot Access	■ High	Always High
Login — 2FA Issue	■ High	Always High
Billing — Payment Failed	■ High	Always High
Billing — Refund Request	■ High	Always High
Certificate — Not Received	■ Medium	→ High if course already ended
Certificate — Expiring Soon	■ Medium	→ High if expiring within 7 days
Technical — General	■ Medium	→ High if platform-wide issue affecting multiple users
Content — Video Not Playing	■ Low	→ Medium if it affects a live session today
Content — Materials Missing	■ Low	→ Medium if session is scheduled today
General Enquiry	■ Low	No auto-upgrade

Priority Age Escalation

- A ticket that starts Low can become Medium if it sits open for 48 hours
- A ticket that starts Medium can become High if it sits open for 72 hours
- This prevents old tickets being ignored forever due to low initial priority
- Admin configures these thresholds in SLA settings

Chapter 18 — Ticket Status Reference

Status	SLA Clock	Who Sets It	What It Means
New	Running	System on creation	Just submitted. No agent has touched it yet.
In Progress	Running	Agent	Agent has acknowledged and is actively working on it.
On Hold	Paused ■	Agent	Waiting on something outside agent's control. Reason mandator
Resolved	Stopped	Agent	Agent believes issue is fixed. CSAT survey fires 15 min later.
Closed	Stopped	System or Agent	Ticket archived. Can be reopened by student within 48 hours.
Closed — No Response	Stopped	System (auto)	Student on hold did not respond within 48 hours. Auto-closed.

Status Transition Rules

From	Can Go To	Who Can Do It
New	In Progress	Agent (when they first reply)
In Progress	On Hold, Resolved	Agent
In Progress	Reassigned (any status)	Admin only
On Hold	In Progress	Agent or Admin
Resolved	Closed (auto after 48hr), Reopened	System or Student
Closed	Reopened → New	Student (within 48 hours)
